

TRANSFER PANEL

Used in the food, dairy, pharmaceutical or biotech industries, Transfer Panels provide separation of CIP and process flows. The unique Transfer Panels help prevent operator error of incorrectly coupling the filling and cleaning lines. Proximity switches alert to any incorrect U-Bend fixture positioning. Drain pans are available to collect any fluids lost while changeover between the ports. Additional features include piping on the rear ports, legs, manual or automatic valves, instrumentation and integrated control panels.

✓ FEATURES

- › Precision machining and welding provide for accurate port locations.
- › Proximity switches available for U- Bend presence sensing.
- › Sanitary stainless steel construction in different finishes available.
- › 304L or 316L stainless available.
- › Precision made U-Bends fit ports accurately every time.
- › Custom designed to fit your needs, verification drawings available in AutoCAD, Solidworks, PDF or IGES format.
- › Tags or laser etching into the plate available for port identification.

**We'll build a transfer panel
to meet your needs.**
