

TRAY FILLING AND LID SEALING

To achieve maximum throughput in a food processing line with many variables, Midway offers an integrated tray filling and sealing system featuring a tray denester, platen conveyor, piston filler and lid sealer.

This inline filling system can be customized to meet your specific application. Originally designed for high-speed packaging of viscous products, the piston filler can be modified for various food products and production volumes and the platen conveyor, denester and lid sealer can be changed over for virtually any size frozen food entrée.

✓ FEATURES

- › Integrated tray denester, platen conveyor, piston filler and lid sealer.
- › Built for easy washdown.
- › Speeds up to 120 trays per minute.
- › Accommodates a wide range of food tray sizes and lid materials.
- › Engineered with greater flexibility for fast, efficient washdown and product changeover.
- › Stainless steel and hard coat anodized aluminum construction, along with stainless steel bearings, provide maximum corrosion protection.

We'll build a tray filling and lid sealing system to meet your needs.
