

STAINLESS STEEL CONTAINER PUMP

Our Stainless Steel Container Pumps are custom designed to fit your application. Using the latest technologies, the stainless steel plumbing offers safe and efficient pumping of food and pharmaceutical fluids or paste of various viscosities.

Many times, the setback with pastes and high viscosity products is the pump cannot be primed so it basically cavitates and pumps air instead of the product. Our Stainless Steel Container Pump maintains a positive prime on the pump, making certain it does not cavitate. Easy to clean and offering quick change over, Midway Container Pumps can be built to accommodate standard and custom size.

FEATURES

- Stainless steel construction.
- Epoxy painted gearbox and motor or stainless steel.
- Custom designed to fit your containers.
- Simple and safe operation.
- Easy to clean.

TYPICAL APPLICATIONS
